

Garden Matchmaking

**Garden
matchmaking is
not a dating
service for
people. Garden
matchmaking is
a dating service
for gardens.**

How garden matchmaking works:

If you **have underutilized land** (an empty planter, a disused yard, an empty lot) in San Luis Obispo or surrounding cities, or **are a gardener in need of extra growing space**—fill out our questionnaire. Our nonprofit facilitates yard sharing between gardeners and landowners providing: letters of understanding, liability insurance, startup help, and connections to information and resources. **The best part is—it's free!**

The goals of garden matchmaking are:

- *To support a sustainable, community-based food system*
- *To alleviate the shortage of community garden spaces*
- *To fully enjoy San Luis Obispo's blessed growing climate*
- *To unite communities*
